DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Group I. Claims 1-25, drawn to combination router and router table, classified in class 144, subclass 371.
- Group II. Claims 26-33, drawn to router having an end plate with a suction duct as one unit, classified in class 144, subclass 136.95.
- Group III. Claims 34-37, drawn to router table insert plate, classified in class 144, subclass 154.5.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group II is constructed with a suction duct and does not require the particulars of the invention Group III (i.e. the separate plate having a suction duct). Accordingly the invention of Group II has separate utility and is therefore separable and distinct. See MPEP § 806.05(d).

Inventions of Group I and Groups II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations

Art Unit: 3725

(MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed as evidenced by claim 1. .

Because these inventions are distinct for the reasons given above and the searches required for Groups I-III are not the same, because of their different classification, and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
